

## Making Maths Matter

EYFS 21/00122

### Course Description:

An excellent course that will help practitioners and teachers recognise the importance of a solid grounding in number. There will be lots of practical examples of how to use concrete materials to support counting and how we can develop children's spatial reasoning skills. Along with suggestions to support problem solving through everyday opportunities. It will include links to the EY Inspection Framework, revised EYFS Statutory Framework and non-statutory guidance.

### Target Audience:

Playworker, Nursery Nurse, Early Years Practitioner, Childminder

### Learning Outcomes:

Delegates will increase their knowledge and skills so they can:

- Help children to develop a strong base knowledge of number
- Encourage children's spatial reasoning skills.
- Make problem solving a part of everyday practice

### How To Book:

You will need an account on our online booking system
